

## Company Info

Metaversum GmbH is working on innovative approaches to Web 2.0 and 3D platforms. The trend-setting company was founded by two successful IT entrepreneurs and a former management consultant & media manager and is backed by a German venture capital firm. With headquarters in Berlin, Germany, it is currently in the process of developing a massive multiplayer online virtual world and social community platform.

## Web developer (Ruby on Rails) with focus on performance and scaling

We are looking for an exceptional web developer to join our team building a large, high-visibility web application. This is a cross-functional role with tasks ranging from software development to architecture.

The ideal candidate will have created multiple web applications that deliver exceptional performance. He/she will be a master of all aspects of Ruby on Rails with a special focus on performance optimization and scaling strategies. He/she will work with a product manager and other engineers and designers to create an exceptional user experience.

### Qualifications:

- Extensive experience developing dynamic web applications using Ruby on Rails, JavaScript/AJAX and MySQL
- Experience integrating with typical Web 2.0 services such as Google Maps API, calendar and other widgets as well as user generated content components such as blog, wiki, forums etc.
- Experience with and interest in performance optimization, deployment and scaling of Ruby on Rails applications

### Soft skills:

- Appreciation of usability and functional beauty
- Commitment to comply with web standards
- Active participation in open-source projects, mailing lists and blogs is appreciated
- Good team working abilities
- Highly motivated
- Our ideal candidate is looking for a full-time occupation

If you think your profile fits this description and if you would like to work in an exciting environment that uses the latest development technologies, please contact [tom@metaversum.com](mailto:tom@metaversum.com)
